- (1) Inflow = number of new registrations as unemployed
- (2) Inflow Rate = monthly inflow to number of current registered
- (3) Outflow = number of persons placed, started training and deleted from registration
- (4) Outflow Rate = monthly outflow to number of current registered
- (5) Placements = number of persons mediated into a new job
- (6) Placement Rate monthly = placements to number of current registered
- (7) Registration Rate = number of current registered to working-age-population
- (8) Inflow (to WAP) Ratio = newly registered to working-age-population
- (9) Placement-Vacancy Rate = number of placements to number of vacancies
- (10) Vacancy-Registration Rate = number of vacancies to number of current registered
- (11) Activation Rate (monthly) = number of entries to training to number of current registered

(!!!) Mostly the above shown labour market indicators refer to the

- a) current month
- b) monthly average
- c) 12 month cumulative average

The Average monthly rates refer to the average of each rate of up to 12 month before – as far as data is available.

The 12-month cumulative average refers to the monthly average in order to allow a comparison of yearly developments
